agencies

define legal reality. They can, of course, create

his life, impugning his trustworthiness, moral rectitude, and integrity for many members of society. An arrest is able to do at least the latter. There are, of course, those for whom an arrest is a mark of honor, or at least of significance. But public exposure is often unavoidable in the private life of a citizen. Surveillance involves encroachments of privacy.<sup>26</sup> Policemen rarely uncovering necessary evidence and exposing a citizen's private life to public scrutiny. Being under surveillance, having one's dwelling and/or person searched, being arrested, booked, brought to trial, and (if it comes to the nature of one's public degradation) all serve as public degradation.

The immense power to determine a felon's public and private life is a variable all likelihood he sees who has technically against the law, but which in no way qualifies him for a pardon.
